Join a multi-disciplinary team of faculty, staff and students working with farmers and farm advisors to investigate key performance indicators that can help advance dairy farm sustainability.

Connect with university staff, farmers and industry leaders in the area of sustainability, and get involved in outreach opportunities.

Participate in visits and extension activities with and for New York dairy farms.

**Interested?**

Email **Dr. Quirine Ketterings** at qmk2@cornell.edu

**No prior experience required**

Applicants should be highly motivated, detail oriented, and have an interest in dairy system sustainability.

---

**Nutrient Management Spear Program**

and participate in the development of **sustainability key performance indicators** for the dairy industry of New York State.

Assist in data collection and analysis related to nutrient management practices and greenhouse gas emissions.

Project funded by Cornell University
